FTTH Virtual Conference 2020: registration is now open!

Brussels, 14 October 2020 – The FTTH Council Europe is pleased to announce the opening of the registration to the FTTH Virtual Conference 2020 taking place on 2 & 3 December, and the early bird offer that will allow Conference attendees to gain more value from their delegate experience.

Registration to the FTTH Virtual Conference 2020 is now open

Registration for the FTTH Virtual Conference 2020, the world's top fibre technology, solutions, digital investments, and policy conference & exhibition, is now open. **The Conference will take place on 2 & 3 December and feature 19 workshops, 17 conference panels sessions and a range of high-profile keynote presentations.**

This year, delegates will also be able to network using artificial intelligence-driven software and browse through seven exhibition halls with more than 100 sponsors and FTTH partners operating interactive virtual exhibition booths and presenting latest fibre-enabled technology solutions.

At the FTTH Conference, it will be possible to hear from and virtually meet senior executives and technical representatives of telecoms operators, top EU and national policymakers, digital industry decision-makers, fibre technology and procurement specialists, infrastructure manufacturers, clients, engineers, investors and a range of other fibre industry stakeholders.

To accompany the launch of the FTTH Virtual Conference 2020, we have redesigned and upgraded the FTTH Conference [website](#) to create a modern and more functional cross-platform resource.

More information and registrations [here](#).

Special Early Bird Offer

Those delegates that sign up before Sunday 8 November will benefit from being able to download the speaker presentation slide decks, gaining early access to the networking platform and four weeks extended use of the virtual conference platform including access to videos from the workshops and conference panel sessions.

*"When we knew that there was no possibility of running a physical conference this year, we set ourselves the ambitious task of creating a virtual event which would be worthy of our annual physical event," said **Vincent Garnier**, Director General, FTTH Council Europe*

"We have engaged the best technology and experts to create an 'experiential' virtual conference environment, rather than just another set of applications".

About the FTTH Council Europe

The FTTH Council Europe is an industry organisation with a mission to accelerate ubiquitous full fibre-based connectivity empowering a leading Digital Society throughout Europe.

Fibre is a future-proof infrastructure which enables an unparalleled fixed and wireless experience as well as new innovative digital technologies and services, the prerequisites for Europe's global competitiveness and sustainability.

The FTTH Council Europe's vision is that fibre connectivity will transform and enhance the way we live, do business and interact, connecting everyone and everything, everywhere.

The FTTH Council Europe consists of more than 150 member companies. www.ftthcouncil.eu
