

FTTH Council Europe's Vice President addresses European Commission's Public Hearing on telecoms

BRUSSELS, 12 November 2015 - FTTH Council Europe's Vice President Ana Pesovic spoke yesterday morning at the Public Hearing on the 360° review of telecoms rules organised by the European Commission.

Included into the recently launched public consultation of the European Commission, the objectives of this hearing were to cover a wide range of issues related to the evaluation and the review of the regulatory framework for electronic communications networks and services.

In her statement, Ana Pesovic observed that the telecoms network infrastructure is an ecosystem. "As in any ecosystem there is collaboration, dependency, interdependence, rivalry and a richness of interaction.", she said. "We see Fibre as the element that underpins the telecoms network infrastructure ecosystem. It is therefore critical for the well-being of our sector that we move to FTTH networks as rapidly as possible".

About the FTTH Council Europe:

The FTTH Council Europe is an industry organisation with a mission to accelerate the availability of fibre-based, ultra-high-speed access networks to consumers and businesses. The Council promotes this technology because it will deliver a flow of new services that enhance the quality of life, contribute to a better environment and increase economic competitiveness. The FTTH Council Europe consists of more than 150 member companies. www.ftthcouncil.eu
